-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Objections***

Claims 2 and 8 are objected to because of the following informalities:

Claim 2 refers to a second and third detection device but does not mention a first detection device.

Claim 8 refers to steps A, B, E, and F but does not mention steps C and D.

Appropriate correction is required.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

---

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-16 are rejected under 35 U.S.C. 102(e) as being anticipated by Watanabe et al. (US 6721499 B2).

In reference to claims 1, 2, 4-16 Watanabe et al. discloses an autofocus apparatus comprising: a first detection device which detects a focusing state by driving a focus lens in an object region; a second detection device which detects a focusing state of the focus lens only near an in-focus position in previous

photographing, col. 9 lines 13-20 and 46-57; a memory device which stores an in-focus position and a photographing condition in photographing, col. 12 lines 16-18; and a first control device which selects said second detection device when previous and current photographing conditions satisfy a predetermined requirement in photographing, and selects said first detection device when the previous and current photographing conditions do not satisfy the predetermined requirement, col. 13 lines 18-40.

In reference to claim 3 Watanabe et al. discloses wherein said second control device so controls as to select said second detection device only when the in-focus position in previous photographing exists in a divided region to be detected later by said third detection device, col. 13 lines 28-40.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Hashimoto (US 6130417) discloses an auto-focusing apparatus with switches between a first and second detection device based on subject brightness.
